The Fender Twin is a guitar amplifier made by Fender Musical Instruments Corporation. It was introduced in 1952, two years before Fender began selling Stratocaster electric guitars. The amps are known for their characteristically clean tone. The Twin has seen a number of revisions since its introduction, both internal and external, with its designs sometimes varying greatly from one year to the ...

A vibrato system on a guitar is a mechanical device used to temporarily change the pitch of the strings. Instruments without a vibrato have other bridge and tailpiece systems. They add vibrato to

the sound by changing the tension of the strings, typically at the bridge or tailpiece of an electric guitar using a controlling lever (alternately referred to as a whammy bar, vibrato bar, or ...
