

### **Functional Neuroanatomy An Interactive Text**

Phrenology, created by Franz Joseph Gall (1758–1828) and Johann Gaspar Spurzheim (1776–1832) and best known for the idea that one's personality could be determined by the variation of bumps on their skull, proposed that different regions in one's brain have different functions and may very well be associated with different behaviours. Gall and Spurzheim were the first to observe the ...

Key: Sites marked with an active student ( ) include active learning exercises (e.g. electronic flashcards or a quiz). Other sites are informative but not interactive (e.g. a dictionary or video). One of the major "tricks" to this course is to be able to switch back and forth between verbal and visual mastery, and the way to do that is to have pictures or models with you as you study the verbal ...

Definition. The term problem solving means slightly different things depending on the discipline. For instance, it is a mental process in psychology and a computerized process in computer science. There are two different types of problems, ill-defined and well-defined: different approaches are used for each.
