

## **Modern Biology Study Guide 11**

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

In biology, taxonomy (from Ancient Greek τάξις (), meaning 'arrangement', and -νομία (), meaning 'method') is the science of naming, defining (circumscribing) and classifying groups of biological organisms on the basis of shared characteristics. Organisms are grouped together into taxa (singular: taxon) and these groups are given a taxonomic rank; groups of a given rank can be ...

The side of a ship on which it was laden (that is loaded) was called the ladeboard, but its opposite, starboard, influenced a change in pronunciation to larboard. Then, because larboard was likely to be confused with starboard because of their similarity of sound, it was generally replaced by port.
