Handloading or reloading is the process of loading firearm cartridges or shotgun shells by assembling the individual components (case/hull, primer, powder, and bullet/shot), rather than purchasing completely assembled, factory-loaded ammunition. The term handloading is the more general term, as it refers to assembly of ammunition using components from any source.

Sierra Bullets Ballistic Technician Duane Siercks answered "I don't know that you would actually call this equipment, but the item that comes to mind would be my reloading room.I had always had to squeeze everything into a corner or even an unheated shed. After we bought our current house, I built a garage and placed it so that I had a window looking down a 250 yard range.
