The main research theme in our group is discovering new electronic properties in organic and hybrid materials. En route to this goal, we are engaged in design and synthesis of novel pi-conjugated molecules and polymers, and study of their optical and electronic behavior, in solution, in thin films and crystals, and in semiconducting devices.

Chemistry is the natural science involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it provides ...

This post originally appeared on [www.paulbracher.com](http://www.paulbracher.com). Here's my list of the top 10 organic chemists of all-time, without regard to nationality or sub-specialty. I'm sure that the list is biased towards academic chemists, because their triumphs tend to be more heralded, but I'm sure most of them took plenty of money from industry, too.

The Nobel Prize in Chemistry has been awarded 110 times to 181 Nobel Laureates between 1901 and 2018. Frederick Sanger is the only Nobel Laureate who has been awarded the Nobel Prize in Chemistry twice, in 1958 and 1980. This means that a total of 180 individuals have received the Nobel Prize in ...
