

### Practice Of Computing Using Python

which is hopefully what you were expecting to see. You can generalize this to multiple modules, using the pattern in mylib.py. Note that for this simple usage pattern, you won't know, by looking in the log file, where in your application your messages came from, apart from looking at the event description. If you want to track the location of your messages, you'll need to refer to the ...

1 Computing with Language: Texts and Words. We're all very familiar with text, since we read and write it every day. Here we will treat text as raw data for the programs we write, programs that manipulate and analyze it in a variety of interesting ways. But before we can do this, we have to get started with the Python interpreter.
