Bluetooth Controlled Robot Car Using Arduino: In this instructable, i'm going to guide you on making a robot car that control over Bluetooth from your android mobile phone. Not only that, the robot car has special ability of avoiding obstacles which it meet when moving the car forward. The ro...

Bluetooth Controlled Robot Car Using Arduino: 8 Steps ...

It should be noted that POE comes into play here as well. 10BASE-T and 100BASE-TX Ethernet use only two pairs of wire in 4-pair CAT5/CAT5e/CAT6 cable, leaving the other two pairs free to transmit power for Power over Ethernet (PoE) applications.

CAT6 wire pair details? - Server Fault

Build a Miniature High-Rate Speed Control with Battery Eliminator Circuit (BEC) January 20, 1998. My first Speed 400 powered plane was the Sydney's Special, an 80% scaled down version of Vernon Williams' Fred's Special, as published in the November 1991 issue of Model Airplane News. I chose this project because I was really happy with my original-size 46½" Speed 600 powered Fred's ...

DShot Protocol¶. The DShot ESC protocol is a digital protocol for communication between a flight board and an ESC. The key advantages are: all values sent to the ESC are protected with a 4 bit CRC

DShot and BLHeli ESC Support — Copter documentation

The relationship between the rotation of the camshaft and the rotation of the crankshaft is of critical importance. Since the valves control the flow of the air/fuel mixture intake and exhaust gases, they must be opened and closed at the appropriate time during the stroke of the piston.
