

### **Small Fuse Box Wiring**

The fuse box in your home is there for protection against power surges and potentially life threatening fires. When there is an overload in the system caused by a short or some other electrical power surge, the fuse will blow instead of letting the power flow continue on to an electrical device.

### **How to Wire a Fuse Box | DoltYourself.com**

A fuse consists of a metal strip or wire fuse element, of small cross-section compared to the circuit conductors, mounted between a pair of electrical terminals, and (usually) enclosed by a non-combustible housing.

Short Circuit: A short circuit occurs when a hot wire carrying a current and a neutral wire touch each other. When this happens, a tremendous amount of current flows, causing a fuse to blow or a

circuit breaker to trip. Sparks may fly and pop, and there may even be a small fire and smoke accompanied by the smell of burning plastic.
