The housing itself will be used as a ground when the solenoid is secured to the engine bay. If the solenoid has two small terminals, connect one terminal to the ignition switch and the second terminal to the engine frame for a ground. Follow the wiring instructions included with the new solenoid.

### **How to Wire a Tractor Solenoid | Hunker**

To wire a 12-volt starter solenoid, first disconnect the black negative cable from the vehicle's battery, and then connect the red battery cable to the large bolt on the solenoid. If it is a remote-mounted solenoid, you must connect a control wire between the control circuit terminal on the solenoid and the car's ignition bypass terminal.
